^ MSCI World Net Index (100%)

Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable).

Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

### Investment objective

To provide long-term capital growth and outperform the greater of the MSCI World Index or the Reserve Bank of Australia cash rate after fees and taxes over rolling seven-year periods. The goal of the option is not to replicate the standard industry benchmarks such as the MSCI, and it is likely to have varied outcomes from those of a traditional index benchmarked option.

### Investment strategy

The option invests in approximately 25 to 45 stock-specific ideas diversified across global markets. The portfolio may also own interest bearing debt securities. All the portfolio positions are subject to intensive research and peer group review. PM Capital can use derivatives and sell stocks short as a risk management tool. The level of direct shorts will not be in excess of 30% of the portfolio. Leverage generally shall not exceed 30% of net asset value of the option. PM Capital may elect to hedge up to 100% of the foreign currency exposure.

### Investment category

Specialist Share

### Investment ranges

Asset class	Range	Benchmark
Cash	0% - 100%	n/a
Equities	0% - 110%	n/a
Yield securities	0% - 30%	n/a

### Minimum suggested timeframe

At least 7 years
