Lifestage 1995-99 option fact sheet | 31 December 2024

## About Lifestage options

As you move through life, your investment needs, financial situation and attitude to risk change. Our Lifestage option provides investments that change as you get older. For each life stage we'll select an investment mix that reflects the typical needs for people at that stage of life. And as you move from one life stage to the next, we'll adjust the investments accordingly.

## Investment objective

To achieve a return of CPI plus 3.0% per annum over rolling ten-year periods after fees and taxes.

## Investment strategy

To invest in a diverse range of assets that are expected to provide long-term capital growth, but which may have a high level of short-to-medium-term volatility. In the very long term, the option's exposure to assets with volatile returns will be reduced to provide greater short-term security. The option may use derivatives with the objective of managing portfolio volatility. The portfolio aims to hedge currency risk except for part of the allocation to global shares (which may include emerging market shares).
